Licenses & Certifications

Cisco certifications:

- **Network Technician Career Path** - Cisco
- **CCNA: Introduction to Networks** - Cisco
- **Introduction to Cybersecurity** - Cisco
- **Computer Hardware Basics** - Cisco
- **Networking Devices and Initial Configuration** - Cisco
- **Networking Basics** - Cisco
- **Introduction to Packet Tracer** - Cisco

Other certifications:

- **KodeKloud Engineer - Docker (Level 1) -** KodeKloud
- **Fortinet Certified Fundamentals Cybersecurity** - Fortinet
- **Getting Started in Cybersecurity 2.0** - Fortinet
- **Introduction to the Threat Landscape 2.0** - Fortinet
- **Linux Terminal for beginners** - Udemy
- **Python for Beginners** - University of Moratuwa
- **Network Security** - Great Learning
- **Introduction to Firewall** - Great Learning

Education History

SLIIT – Malabe Oct - (2022 to Present)
BSc Honours-IT-Computer System & Network Engineering - Final year undergraduate)

About Me

I am currently working as a IT Support Specialist(L1) position and final year 1st semester IT undergraduate student specializing in Computer Systems & Network Engineering. Passionate about Networking, DevOps, Cloud Computing, Cyber security fields. I am seeking an junior position in my passionate field to apply hands-on experience to diverse certifications, while continuously expanding my knowledge and skills.

Work Experience & Projects

Experience :

IT Support Specialist (L1)- (2025 July to Present)

Provide on-site IT support to MAS Capital (Pvt) Ltd-Technology Service for IT issues, maintaining asset management system and other systems, printer and IOT based troubleshooting, first level network monitoring, maintain IT related procurement as contract employment.

IT Support Associate (L0) - (2024 July to 2025 July)

Provided IT on-site support to MAS Capital (Pvt) Ltd-Femography. Got a good hand on experience in End-user handling, IT Infrastructure management.

Final Year Undergraduate Student at SLIIT

I have some experience in Windows, Linux & Mac computer systems, cloud computing, Enterprise networking & network design, configuration, troubleshooting, project management, Desktop application, IOT and how to deal with cybersecurity and Network security concept.

Projects :

Implementation of a Linux-based Domain Controller with Active Directory and Zabbix Monitoring (Individual project)

3rd year 2nd semester **Directory Services and Network Management** module.

- Implementing a Linux server as an Active Directory-compatible domain controller using Samba and Kerberos, enabling centralized user authentication for client systems. Integrated Zabbix to monitor server and network health, ensuring real-time visibility into system performance and security.

Design and Implementation of a Scalable Wireless Network for a University Campus (Individual project)

3rd year 2nd semester **Wireless Communication** module.

- Designing a robust wireless network technical document for University, addressing high-density user demands, IoT integration, and BYOD policies. The project involved needs assessment, network architecture design, security planning, cost analysis, and implementation scheduling with future scalability considerations.

Enterprise SD-WAN Network Redesign for Beezet Group of Companies (BGC) (Individual project)

3rd year 2nd semester **Wide Area Networks** module.

- Prepared comprehensive technical documentation for a large-scale SD-WAN network redesign project, covering architecture planning, routing strategy, network segmentation, cybersecurity framework, resiliency planning, and centralized monitoring—supporting high availability, scalability, and regulatory compliance for a multi-site enterprise network.

Cisco Network Academy - (Jan 2025 to Present) Currently studying for **CCNA and CCST-Cybersecurity certifications** under the guidance of Yasiru Nirmala Herath (Network & Cybersecurity Team Lead | Cisco Certified Instructor).

Rajapaksa Central College-Weeraketiya, Sri Lanka - (Mar 2017 - Aug 2020)
Physical Sciences

- Appeared for the GCE A/L examination under Physical Science stream and obtained 03 award passes for com.Maths, Chemistry, Physics.

Technical Skills

- Researching Areas(DevOps, AI, Linux, Cloud computing, Cybersecurity)
- Network Monitoring & Basic troubleshooting
- IT Infrastructure maintenance & Asset management
- IT Systems troubleshooting & Maintenance
- Project management & Technical Documentation
- Cloud computing concepts
- Cisco Network Devices
- Linux, Windows & MacOS
- Cybersecurity Concept and best practices
- Scripting
- Azure portal & Microsoft O365

Soft Skill

- Leading & managing workflows
- Time management
- Good team player
- Communication & collaboration
- Problem-solving and analytical abilities
- Quick learner and technology enthusiast

Software currently in use:

- Azure admin portal
- Familiar with DevOps Tools(Docker, Kubernetes, Git)
- draw.io
- Wireshark
- Oracle VM VirtualBox
- VMware Workstation
- Visual studio code
- Microsoft O365
- Cisco Packet Tracer & GNS3

Nagios Monitoring Setup & DNS Caching Setup with CentOS Server and Fedora Clients (Individual project)
2nd year 2nd semester **Computer Systems Administration** module.

- This project involves installing and configuring Nagios Core on a CentOS server to monitor Fedora clients and setting up a DNS caching server on the CentOS server for faster DNS resolution by the Fedora clients. It includes defining hosts and services to check availability and performance metrics, as well as verifying DNS resolution on the clients.

Automate Automobile Safety System with IOT(group project)
Position : project leader
2nd year 2nd semester **Professional Engineering Practice and Industrial Management** module.

- The project's goal is to create and implement an advanced vehicle safety enhancement system. This system will integrate to monitor driver attention, identify, and prevent crashes, adapt to changing weather conditions, optimize lighting for visibility, and deploy a predictive Braking System.

Java desktop application for Hotel reservation system (group project)
Position : project leader
2nd year 1st semester **Object Oriented Programming** module.

Network design for university (group project)
Position : project leader
1st year 2nd semester **Network Fundamentals** module.

Vehicle insurance management system (group project)
Position : project leader
1st year 2nd semester **Information Systems and Data Modeling** module.

- This project aims to identify the data requirements to ER diagram and develop the database using SQL.
